

HANDS - ON PROJECT

The project includes the data from Aircraft manufacturing industry, which is dominated by the worlds leading companies. The companies are just 2-3. Most of the time the companies do not sell the aircraft, but they lease it to the customers. The footfall of each company can be seen worldwide. Please create the following reports to provide the insight on the industry.

1. Region wise Client spread(Map Representation), also give drill down pop up for country in the same map
2. Age of Aircraft - Avg of (today's date - Manufacturing Date)
3. Client wise Security submit
4. Client wise Revenue along with forecast
5. Present KPIs on top in dashboard for Avg. Engine PRSV Rate (for each engine per FH),Avg Engine LLP Rate (for each engine per FC), Avg APU Overhaul Rate (per FH), Avg Landing Gear Overhaul Rate (per month),Avg Aircraft MTOW (lbs)
6. Trend for number of aircrafts getting manufactured on each year by each client.
